Geotech Environmental Equipment and Delta Epsilon Instruments – Advancing Responsible Environmental Stewardship

Geotech Environmental Equipment, Inc., and Delta Epsilon Instruments are pleased to announce that Delta Epsilon and its product offerings have officially become part of Geotech Environmental Equipment, Inc. This brings together two companies with a shared mission: to advance the responsible stewardship of the environment and ultimately improve the human condition.

For decades Fred Fowler Jr, President of Delta Epsilon and member of the founding family of Mt. Sopris Instrument Co., has designed and built a product line that reflects an unmatched legacy of well logging systems that are in use globally, literally from Armenia to Zambia.

“This is an exciting opportunity for both organizations,” said Mr. Fowler Jr., “Delta Epsilon has always strived to provide our customers with industry-leading products, service, and support and I am confident that together with Geotech we will have even greater resources at our disposal to serve our client better than before.”

"We're thrilled to welcome Delta Epsilon Instruments to the Geotech family," said Jeff Popiel, President of Geotech Environmental Equipment. "This will allow us to combine our strengths and resources to better serve our customers globally"

Geotech Environmental Equipment, Inc. is a leading manufacturer and distributor of environmental equipment for groundwater sampling, monitoring and remediation. Equipment offered is used by various industries including water management, oil & gas, mining, and more. With this acquisition, Geotech adds Delta Epsilon’s impressive portfolio of well logging systems for groundwater exploration, water well development, and geotechnical natural resources applications which further expands Geotech’s ability to meet customer needs in these markets.
