

# Geotech dispos-a-filter™ PES Filter Capsules

The Geotech PES (Polyethersulfone) dispos-a-filter™ is the easiest and most cost efficient way to prepare water samples for trace metals analysis. Geotech's dispos-a-filter capsules feature self-contained absolute rated pore size membranes that are scientifically designed to meet U.S. EPA filtration regulations. When field or laboratory filtration is required, the dispos-a-filter™ is perfect for maximum flow capacity and retention of particulate matter.

### FEATURES

- Array of filter sizes to meet application specific requirements
- Lot tested for metals to assure pure sample integrity
- No pre-rinsing, cleaning, or assembly required
- Absolute rated pore size for true particulate retention
- Intended for groundwater and surface water filtration for trace metals analysis
- Meets U.S. EPA regulatory .45µm filtration standards
- Barbed and threaded influent tube connection
- Flow direction indicator on label
- Lot number is marked on each filter

### SPECIFICATIONS

<b>Membrane Material</b>	PES (Polyethersulfone)

### CERTIFICATION

Geotech PES dispos-a-filters™ are manufactured in a clean environment under controlled conditions. The COA (certificate of analysis) report is accredited by ISO/IEC 17025 compliance.
